

Dear Parents and Caregivers,

Your child may have been coming home with stories about Santa's reindeer falling ill or the sleigh breaking down. Santa has asked the children in the Junior Syndicate for help. He has asked them to invent a new flying machine that will help him to deliver all the presents on Christmas Eve. Please go along with this 😊

As part of the Technology process the children have been very busy over the past few days creating a plan for an amazing flying machine. They had to think about what machines need to fly e.g does it need wings, a tail, what fuel, some sort of landing gear to name a few.

The next part of the process is to make a model of their invention. To do this they will need your help.

Today we are sending home a copy of their plan. Please make time to discuss this with them and talk about the different features they have on their machine. They will then need to gather items from home to make their flying machine in class next week. Possible items might be: small boxes or containers, milk bottle lids, corks, pipe cleaners, plastic for windows, bits of wood etc. Be imaginative.

Please bring these items to school as soon as possible in a named plastic bag.

Thank you for your support with this. We are looking forward to making these. If you have any questions, please do not hesitate to ask your child's teacher.
